- Every API requires **token** unless it's creating new record in the table

Table / Service module	URL path	Body (POST) or Header params (GET)	Method	Usage
DOCTORS	/doctors/insert/		POST	Create / Inser new doctors
DOCTORS	/doctors/delete/		DELETE	Delete entry / row in doctors
DOCTORS	/doctors/select/name		GET	Get record of name
DOCTORS	/doctors/insert/name		POST	Create record of name
DOCTORS	/doctors/update/name		PUT	Change record of name
DOCTORS	/doctors/delete/name		DELETE	Delete record of name
DOCTORS	/doctors/select/license_code		GET	Get record of license_code
DOCTORS	/doctors/insert/license_code		POST	Create record of license_code
DOCTORS	/doctors/update/license_code		PUT	Change record of license_code
DOCTORS	/doctors/delete/license_code		DELETE	Delete record of license_code
DOCTORS	/doctors/select/license_expiry_date		GET	Get record of license_expiry_date

Table / Service module	URL path	Body (POST) or Header params (GET)	Method	Usage
DOCTORS	/doctors/insert/license_expiry_date		POST	Create record of license_expiry_date
DOCTORS	/doctors/update/license_expiry_date		PUT	Change record of license_expiry_date
DOCTORS	/doctors/delete/license_expiry_date		DELETE	Delete record of license_expiry_date
DOCTORS	/doctors/select/qualification		GET	Get record of qualification
DOCTORS	/doctors/insert/qualification		POST	Create record of qualification
DOCTORS	/doctors/update/qualification		PUT	Change record of qualification
DOCTORS	/doctors/delete/qualification		DELETE	Delete record of qualification
DOCTORS	/doctors/select/qualification_level		GET	Get record of qualification_level
DOCTORS	/doctors/insert/qualification_level		POST	Create record of qualification_level
DOCTORS	/doctors/update/qualification_level		PUT	Change record of qualification_level
DOCTORS	/doctors/delete/qualification_level		DELETE	Delete record of qualification_level
SUBMISSIONS	/submissions/insert/		POST	Create / Insert new submissions
SUBMISSIONS	/submissions/delete/		DELETE	Delete entry / row in submissions
SUBMISSIONS	/submissions/select/description		GET	Get record of description
SUBMISSIONS	/submissions/insert/description		POST	Create record of description
SUBMISSIONS	/submissions/update/description		PUT	Change record of description

Table / Service module	URL path	Body (POST) or Header params (GET)	Method	Usage
SUBMISSIONS	/submissions/delete/description		DELETE	Delete record of description
SUBMISSIONS	/submissions/select/age		GET	Get record of age
SUBMISSIONS	/submissions/insert/age		POST	Create record of age
SUBMISSIONS	/submissions/update/age		PUT	Change record of age
SUBMISSIONS	/submissions/delete/age		DELETE	Delete record of age
SUBMISSIONS	/submissions/select/gender		GET	Get record of gender
SUBMISSIONS	/submissions/insert/gender		POST	Create record of gender
SUBMISSIONS	/submissions/update/gender		PUT	Change record of gender
SUBMISSIONS	/submissions/delete/gender		DELETE	Delete record of gender
SUBMISSIONS	/submissions/select/client_email		GET	Get record of client_email
SUBMISSIONS	/submissions/insert/client_email		POST	Create record of client_email
SUBMISSIONS	/submissions/update/client_email		PUT	Change record of client_email
SUBMISSIONS	/submissions/delete/client_email		DELETE	Delete record of client_email
SYMPTOMS	/symptoms/insert/		POST	Create / Inser new symptoms
SYMPTOMS	/symptoms/delete/		DELETE	Delete entry / row in symptoms
SYMPTOMS	/symptoms/select/description		GET	Get record of description
SYMPTOMS	/symptoms/insert/description		POST	Create record of description
SYMPTOMS	/symptoms/update/description		PUT	Change record of description
SYMPTOMS	/symptoms/delete/description		DELETE	Delete record of description

Table / Service module	URL path	Body (POST) or Header params (GET)	Method	Usage
SYMPTOM_TAG_RELATIONS	/sympom_tag_relations/insert/		POST	Create / Inser new symptom_tag_relations
SYMPTOM_TAG_RELATIONS	/sympom_tag_relations/delete/		DELETE	Delete entry / row in symptom_tag_relations
DOCTOR_TAG_RELATIONS	/doctor_tag_relations/insert/		POST	Create / Inser new doctor_tag_relations
DOCTOR_TAG_RELATIONS	/doctor_tag_relations/delete/		DELETE	Delete entry / row in doctor_tag_relations
TAGS	/tags/insert/		POST	Create / Inser new tags
TAGS	/tags/delete/		DELETE	Delete entry / row in tags
TAGS	/tags/select/tag_name		GET	Get record of tag_name
TAGS	/tags/insert/tag_name		POST	Create record of tag_name
TAGS	/tags/update/tag_name		PUT	Change record of tag_name
TAGS	/tags/delete/tag_name		DELETE	Delete record of tag_name
BOOKING_EVENTS	/booking_events/insert/		POST	Create / Inser new booking_events
BOOKING_EVENTS	/booking_events/delete/		DELETE	Delete entry / row in booking_events
BOOKING_EVENTS	/booking_events/select/start_time		GET	Get record of start_time
BOOKING_EVENTS	/booking_events/insert/start_time		POST	Create record of start_time
BOOKING_EVENTS	/booking_events/update/start_time		PUT	Change record of start_time
BOOKING_EVENTS	/booking_events/delete/start_time		DELETE	Delete record of start_time

Table / Service module	URL path	Body (POST) or Header params (GET)	Method	Usage
BOOKING_EVENTS	booking_events/select/end_time		GET	Get record of end_time
BOOKING_EVENTS	booking_events/insert/end_time		POST	Create record of end_time
BOOKING_EVENTS	booking_events/update/end_time		PUT	Change record of end_time
BOOKING_EVENTS	booking_events/delete/end_time		DELETE	Delete record of end_time
BOOKING_EVENTS	booking_events/select/reference		GET	Get record of reference
BOOKING_EVENTS	booking_events/insert/reference		POST	Create record of reference
BOOKING_EVENTS	booking_events/update/reference		PUT	Change record of reference
BOOKING_EVENTS	booking_events/delete/reference		DELETE	Delete record of reference
